Remote Learning plan for ELF pupils not accessing on-site school provision:

Areas of support	Actions
Ensuring pupils access education that is appropriate to their needs whilst not attending school	• Enable the learning program for the pupil to be continued at home that allows pupils to access suitable, high quality online and offline resources and teaching videos (where appropriate), that are linked to the school's curriculum pathway provision (ELF) • Ensure pupils are supported to build knowledge and skills incrementally, as they would be supported to do in school • Supply work and learning activities that enable the most important elements (Prime areas of learning) of the pupil's current timetable to continue at home ensuring access to continuous provision activities • Direct parents or carers to specific lessons on the Oak National Academy Website (www.thenational.academy) that are in accordance with the pupil's current learning objectives • Ensure parents or carers have access to their child's individual programs e.g. ILP, SALT, CJ, OT etc to enable these to continue to be delivered at home • Prepare activities that can be collected by the parent/carer. This should contain suitable tasks and activities that a parent/carer can deliver at home to their child, that are sufficiently resourced for the parent/carer to do so. The parent/carer can then hand this back when the pupil returns to school
